

PCs running any version of the Microsoft Windows Operating System will need regular maintenance and updates, especially if children are actively using the machine. All hardware and software manufacturers provide frequent updates to their products to protect against new vulnerabilities.

Keeping your computer up-to-date with antivirus software, service packs and critical updates should be a priority. If your computer is slow and not as peppy as it once was - your system might be compromised by an infection. We are known for our quick 24 hour turnaround, door to door pickup/delivery, and great customer service.

ESydor Tech provides the following PC support services:

- 24-48 hour turn around, fastest in the industry
- Full Virus and Spyware Removal & Recovery
- Harddrive Data Recovery Services
- Loaner computers are available to our clients, so while we repair your system you can continue to work
- Memory & Solid State Harddrive Upgrades
